

Ince, F. (2017). A review of the minerals associated with the igneous rocks of southwest Leicestershire. *Journal of the Russell Society*, **20**, 3–29. On page 25, the final sentence of the quotation describing the Miller Indices for some quartz crystals should read: “Of 52 crystals examined, 43 showed the development of the left trigonal pyramid  $\{2\bar{1}11\}$ , and rarely the left trigonal trapezohedron  $\{6\bar{1}51\}$ .” (not  $\{6\bar{1}11\}$ ).
